

RG65 UK National Class Association

Annual General Meeting
3 March 2021

Motion 1

The RG65 NCA Committee propose a motion to add an Appendix to the 2014 RG65 Class rules which allow_s for up to 4 Rigs to be used at any event. This Appendix will expire when an updated version of the RG65 Class Rules is published.

Background to this Committee Motion

There has been discussion within the UK membership for some years regarding the limit of 3 rigs for all RG65 events, irrespective the type or duration of the event.

A number of members feel that limiting the class to 3 rigs for a multi-day event means that sailing can be compromised, especially if the forecasted weather over the duration of the event shows significant changes in the weather, or if the forecast is unreliable.

The Committee therefore wish to propose an Appendix to the 2014 class rules to allow the concept of 4 rigs to be tested at future events.
